*** Key Food & Drink Markets Definition**

Market data refer to all products sold for final human consumption in retail, foodservice and artisanal markets (own-produced for own sale), thus excluding industrial and intermediate consumption and auto-consumption. Retail and foodservice buy-in prices are applied throughout. For product market definitions, see www.fft.com.

Matching FFT Reports

(by country, company, product sector or single product)

FFT maintains an interactive, continuously updated online database covering food & drink markets in 25 countries, from which all reports, large and small, are produced. Thus:

- This report is available for all countries.
- Any product sector is available for any choice of countries, e.g. Ready Meals in France or in Central Europe.
- Any country/company/product/data selection is possible.

1.3 The Total Food and Drink Market in Spain

The total food and drink market in Spain in 2010 was Euro 95.7 billion.

In Europe, Spain had a 7.6% share of the market for a 9.0% share of the population

* See full "Key Definition" of Food & Drink Markets covered in box bottom of next page.

Altogether 22 country markets are covered, including all the 27 European Community (EC) members (excepting only the 3 Baltic states and Slovenia, Malta and Cyprus), plus non-members Norway and Switzerland. Belgium and Luxembourg are treated as a single entity.

1.4 Market Size and Growth by Product Group

Altogether 114 products markets are covered in this report, distributed among 20 product groups (see graph for market size and growth). These are analysed in detail in this Executive Summary.

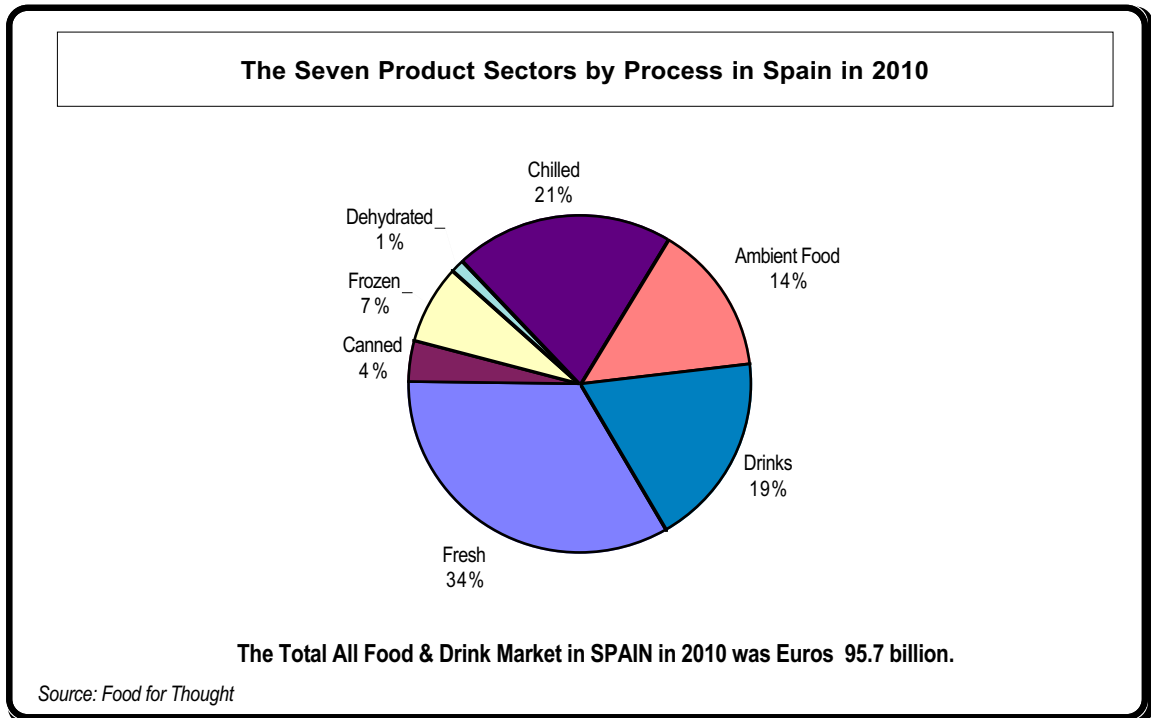

1.5 Market Size by Process

The 114 food and drink product markets covered in this report can be grouped into seven sectors by process: Ambient, Fresh, Canned, Chilled, Frozen, Dehydrated and Drinks. Clearly Fresh Products, with 34% of the all food & drink market by value, tends to distort the picture for packaged products. These process sectors are analysed in detail below.

The Seven Food & Drink Product Sectors by Process in Spain in 2010 *

Fresh Products account for 33.5% of the total market.

1.6 Market Growth and Forecasts by Process

Fresh Products were the fastest growing sector over the 2005 - 2010 period, increasing by Euro 1057 million per year, or a real average annual 1.12% during the five-year period. Dehydrated products however achieved a higher average annual percent growth rate of 1.12%. **Detailed 2010-2013 forecasts for all products and years are provided in the main report.**
